## SKYDANCE

## AC Triac RF + Push Dimmer

Model No.: TR1
RF dimming/Numeric display/Leading edge or trailing edge/Min brightness settable/Push Dim/Din rail

## Features

- RF + Push AC phase-cut dimmer, 1 channel outpu.
- To dim and switch single color dimmable LED lamps,
traditional incandescent and halogen lights.
- Digital numeric display, set brightness by bottons.
- 0-100\% dimming smoothly without any flash.
- Reverse-phase dimming or forward-phase dimming selectable.
- Minimum brightness sef from $1 \%$ to $40 \%$.

Light on/off fade time 0-20s selectable.

- Compatibility with RF 2.4 G single zone or multiple zone dimming remote control.
- Connect with external push switch to achieve on/off and 0-100\% dimming function.
- Overheat protection, recover automatically

Technical Parameters

| Input and Output |  |
| :---: | :---: |
| Input voltage | 100-240VAC |
| Output voliage | 100-240VAC |
| Output current | $1 \mathrm{CH}, 2 \mathrm{~A}$ |
| Output power | 200-480W |
| Safety and EMC |  |
| EMC standard (EMC) | ETSI EN 301489.1 V2.2.3 ETSI EN 301489.17 V. 3.2 .4 |
| Safety standard(LVD) | EN 62368-1:2020+A11:2020 |
| Radio Equipment(RED) | ETSI EN 300328 V 2.2 .2 |
| Cerification | CE,EMC,IVD, RED |

| Dimming data |  |
| :---: | :---: |
| Input signal | 3 Buttons <br> RF 2.4 GHz <br> AC Push |
| Dimming level | 100 levels |
| Dimming range | 0-100\% |
| Environment |  |
| Operation temperature | Ta $: 30^{\circ} \mathrm{C} \sim+55^{\circ} \mathrm{C}$ |
| Case temperature (Max.) | Tc: $+85^{\circ} \mathrm{C}$ |
| IP rating | IP20 |
| Warranty |  |
| Warranty | 5 years |

## Compatible Load Types

| Load Type | Maximum Load | Remarks |
| :---: | :---: | :---: |
| Dimmable LED lamps | 300 W @ 220V <br> 150 W @ 110 V | Due to variety of LED lamp designs, maximum number of LED lamps <br> is further dependent on power factor result when connected to dimmer. |
| Triac Dimmable <br> LED drivers | 300 W @ 220V <br> 150 W @ 110 V | Maximum permitted number of drivers is 300 W divided by driver nameplate <br> power rating, and make sure the surge current is no more than 2 times 65A. |
| Incandescent lighting, <br> HV Halogen lamps | 500 W @ 220V <br> 250 W @ 110 V |  |

## Mechanical Structures and Installations

## System parameter setting

- Long press $\boldsymbol{U}$ and - key for 2 s , prepare for setup system parameter: control method, minimum brightness curve light on/off fade time, automatic blank screen. short press $\mathcal{U}$ key to switch four item.
- Control method: short press - or + key to switch forward-phase("C-F") or reverse-phase("C-R")

## Forward-phase control dimmer

Reverse-phase control dimmer

- Minimum brightness: short press - or + key to set minimum brightness,
from $1 \%$ to $40 \%$ ("b01" to"b40"). You need set suitable minimum brightness to avoid flick.
- Light on/off fade time: short press - or + key to switch $0.5 s($ ("d00"), 2s("d02"), 3s("d03"), 5s("d05"), 10s("d10" or 20 s ("d2O") fade on/off fime.
- Automatic blank screen: short press - or + key to switch enable("bon") or disable("boF") automatic blank screen
- Long press M key for 2 s or timeout 10 s, quit system parameter setting.

## Restore factory default parameter

- Long press - and + key for 2 s , restore factory default parameter, display "RES"
- Factory default parameter: $100 \%$ brightness, rerverse-phase control, $5 \%$ minimum brightness,
0.5 s fade on/off time, disable automatic blank screen.

## Dimming by 3 buttons

- Short press $\circlearrowright$ key, turn on or turn off light.

When display pencent brightness value (001~100), the light is on.
When display "bon", the light is off.

- When light is on, Press - or + key to change brightness, long press for continuous adjustment.

## Dimming by Push switch

The provided AC Push-Dim interface allows for a simple dimming method using commercially available non-latching momentary) wall switchs.

## -Short press:

Turn on or off light.

- Long press ( $1-6 \mathrm{~s}$ ):

Press and hold to step-less dimming,
With every other long press, the light level goes to the opposite direction

- Dimming memory:

Light returns to the previous dimming level when switched off and on again, even at power failure.
Synchronization:
If more than one dimmer are connected to the same push switch, do a long press for more than 10 s, then the system is synchronized and all lights in the group dim up to $100 \%$.
then the system is synchronized and all ights in the group dim up to $100 \%$.
This means there is no need for any additional synchrony wire in larger installations.
We recommend the number of dimmers connected to a push switch does not exceed 25 pieces,
We recommend the number of dimmers connected to a push switch does not exceed 25 p
The maximum length of the wires from push to dimmer should be no more than 20 meters.

## Dimming by RF remote

## Match Remote Control (two match ways)

End user can choose the suitable match/delete ways. Two options are offered for selection:

## Use the Match key

Match:
Long press Match key for 2s, display "RLS"
within 5 s , press on/ off key (single zone remote) or zone key (multiple zone remote) of the remote, display "RLO", match is successful.

Delete:
Long press Match key for 5 s , until display "RLE" delete all matched remote

## RF remote application notes

1. All the receivers in the same zone

Auto-transmitting: One receiver can transmit the signals from the remote to another receiver within 30 m , as long as there is a receiver within 30 m , the remote control distance can be extended. Auto-synchronization: Multiple receivers within 30 m distance can work synchronously when they are controlled by the same remote
Receiver placement may offer up to 30 m communication distance. Metals and other metal materials will reduce the range. Strong signal sources such as WiFi routers and microwave ovens will affect the range.
We recommend for indoor applications that receiver placements should be no further apart than 15 m .
2. Each receiver(one or more) in a different zone, like zone 1,2,3 or 4 .
